11.0	10.0	28.5	17.2
11.5	10.5	29.0	17.6

## THINGS TO REMEMBER...

When converting men's sizes from women's, go down 1.5 sizes. For example, a women's size 8.5 is roughly equivalent to a men's size 7. Keep in mind that men's shoes run slightly wider than women's.

When converting from women's to youth, go down two sizes. For example, women's 5 is similar in fit to a youth 3. Also, you can reference the youth sizing chart above for centimeter conversions.
