Taking Top Measurements:

Band Size

Wear a non-padded bra and use a soft tape measure. Hold the tape measure around your back at band level. Then bring it to the front, just above your bust.

The resulting number is your band size.

* if the number is odd, round down to the nearest even number

Bust Measurement

Thread tape measure under arms, across shoulder blades at back around fullest part of bust at front. Relax arms at sides while keeping tape parallel with the floor.

This is your bust measurement.

* round up if 1/2 inch or above

Cup Size

Difference	Size
0 inches	AA
1 inch	A
2 inches	B
3 inches	C
4 inches	D
5 inches	DD

Subtract the band size from the bust measurement.
This number equates to your letter cup size.

$$\text{Bust Measurement} - \text{Band Size} = \text{Cup Size}$$

Waist Measurement

Bend to one side to find natural indentation in torso. This is your natural waist. Run tape around natural waistline, keeping tape parallel with floor and one finger between body and tape for a more comfortable fit.

Hip Measurement

Stand on a level surface with feet together. Measure around fullest part of hips and bottom (approximately 7"-9" below waistline), keeping tape parallel with floor.
