

## Sizing

The shoe industry does not have consistent standards that apply to all shoe stores, brands and shoes. To reduce the risk of our shoes not fitting your child, we highly recommend you measure your child's feet before ordering, as the size may not correspond directly with your child's typical size.

### How to measure your child's feet:

1. Stand your child barefoot on a piece of paper.
2. Draw a line at the top of the child's longest toe and at the heel of the foot. Repeat for the other foot. Measure both feet for accuracy, if one foot is larger, choose the larger foot.
3. Use a ruler to measure the distance between the two lines. This is the measured foot length. The shoe inner length should be between 5mm to 10mm longer to account for growth and wiggle room (slightly more if socks are worn).

For insole lengths, please refer to the size charts over page.

\* Most shoes should have an insole length 5mm to 10mm longer than the measured foot length. However these flower ballet flats with a snug, elastic, ballerina style, require 15mm to 20mm longer. For flower ballet flats, we recommend increasing one size, to allow for this extra 10mm.
